

Name Date

Team Puffin October 19, 2018

Use this week's issue of TIME for Kids (Edition 3–4) to answer the questions. For each question, circle the letter next to the best answer.

RI.3.1; RI.4.1

- 1.** Where do puffins spend most of their lives?
- A. out at sea
 - B. on seaside cliffs
 - C. in trees
 - D. on the beach

RI.3.1; RI.4.1

- 2.** How many people live on Heimaey?
- A. 4,200
 - B. a half million
 - C. 1½ million
 - D. 4 million

RI.3.7; RI.4.7

- 3.** You can tell from looking at the map that Iceland is
- A. in Africa.
 - B. on the equator.
 - C. an island in the Atlantic.
 - D. a continent.

RI.3.1; RI.4.1

- 4.** To find their way to the sea, pufflings use their instinct to follow
- A. their parents.
 - B. the light of the moon.
 - C. the children of Heimaey.
 - D. the sound of the ocean.

RI.3.3; RI.4.3

- 5.** How do Heimaey's bright lights affect the pufflings?
- A. The lights help the birds to find the sea more quickly.
 - B. The lights make the birds return to their nests.
 - C. The lights confuse them into thinking it is daytime.
 - D. The lights confuse the birds and they end up lost.

RI.3.1; RI.4.1

- 6.** What is the Puffling Patrol?
- A. a group of scientists that track pufflings
 - B. a group of kids who rescue lost pufflings
 - C. a group of pufflings that guard the beach at night
 - D. a group of parents who are working to protect pufflings

RI.3.5; RI.4.5

- 7.** The section "Puffins in Peril" is mostly about the
- A. tracking of puffins.
 - B. threats puffins are facing.
 - C. rising ocean temperatures.
 - D. work of Project Puffin.

RI.3.4; RI.4.4

- 8.** What does the word peril mean, in the subheading "Puffins in Peril"?
- A. protection
 - B. safety
 - C. danger
 - D. fear

RI.3.8; RI.4.8

- 9.** Scientist Erpur Hansen would most likely agree that the Puffling Patrol
- A. is unhelpful.
 - B. should stop puffling rescues.
 - C. has helped puffin research.
 - D. has no more work to do.

RI.3.2; RI.4.2

- 10.** This article is mostly about
- A. how kids are helping pufflings.
 - B. the life cycle of puffins.
 - C. worldwide efforts to conserve puffins.
 - D. scientists' research on puffins.

Bonus Scientists track puffins to learn more about them. How might knowing more about puffins help the scientists to protect these seabirds?
